

**Product Name** : DSR-6434  
**Cat. No.** : PC-20226  
**CAS No.** : 1059070-10-8  
**Molecular Formula** : C<sub>19</sub>H<sub>28</sub>N<sub>8</sub>O<sub>2</sub>  
**Molecular Weight** : 400.49  
**Target** : Toll-like Receptor (TLR)  
**Solubility** : 10 mM in DMSO

## Biological Activity

DSR-6434 (DSR6434) is a highly potent, specific **TLR7** agonist with EC<sub>50</sub> of 7.2 nM (hTLR7) and 4.6 nM (mTLR7) for stimulating reporter gene activity in HEK293 cells expressing TLR7.

DSR-6434 shows no activity in HEK293 cells expressing the structurally similar hTLR8 or hTLR9.

DSR-6434 induces type 1 interferon and activation of T and B lymphocytes, NK and NKT cells.

DSR-6434 intravenous administration enhances the efficacy of ionizing radiation (IR) and leads to improved survival in mice bearing either CT26 or KHT tumors.

DSR-6434 in combination with IR primes an antitumor CD8<sup>+</sup> T-cell response leading to improved survival in syngeneic models of colorectal carcinoma and fibrosarcoma.
