

Product Name : TGN-020
Cat. No. : PC-20300
CAS No. : 51987-99-6
Molecular Formula : C₈H₆N₄OS
Molecular Weight : 206.22
Target : Other Targets
Solubility : 10 mM in DMSO

Biological Activity

TGN-020 (TGN020) is a potent, selective aquaporin 4 (AQP4) inhibitor with IC₅₀ of 3 μ M. TGN-020 significantly reduced the cortical infarct volume, with no effect on basal ganglia infarct volume. Pretreatment with TGN-020 significantly reduced the severity of brain edema associated with brain ischemia. TGN-020 significantly increases regional cerebral blood flow in vivo, TGN-020 can alleviate spinal cord edema, inhibit glial scar formation, and promote axonal regeneration, conferring beneficial effects on recovery in rats.
