

Product Name : ELOVL6 inhibitor Compound B
Cat. No. : PC-20306
CAS No. : 1135000-36-0
Molecular Formula : C₂₀H₂₀F₃N₃O₃S
Molecular Weight : 439.45
Target : Other Targets
Solubility : 10 mM in DMSO

Biological Activity

ELOVL6 inhibitor Compound B is a potent and selective **ELOVL6** inhibitor with IC₅₀ of 85 and 38 nM for human and mouse ELOVL6, respectively.

Compound B is about 10-fold greater than that of Compound A.

Compound B displays >60-fold selectivity over the other ELOVL family enzymes (ELOVL1, 2, 3, and 5).

Compound B shows the mode-of-action of an ELOVL6 inhibitor in a non-competitive manner for malonyl-CoA and in an un-competitive manner for palmitoyl CoA.

Compound B effectively inhibits ELOVL6 activity in the liver.

Compound B shows significant reduction in hepatic fatty acid composition in model animals, diet-induced obesity (DIO) and KKAY mice.
