
Product Name	: JZL184
Cat. No.	: PC-20486
CAS No.	: 1101854-58-3
Molecular Formula	: C ₂₇ H ₂₄ N ₂ O ₉
Molecular Weight	: 520.49
Target	: Monoacylglycerol Lipase (MAGL)
Solubility	: 10 mM in DMSO

CAS: 1101854-58-3

Biological Activity

JZL184 (JZL 184) is a potent, selective and irreversible MAGL inhibitor, blocks 2-Arachidonoylglycerol (2-AG) hydrolysis in brain membranes with IC₅₀ of 8 nM, >300-fold selectivity for MAGL over FAAH.

JZL184 increases 2-AG but not AEA concentrations in mouse brain.

JZL184-treated mice exhibited a broad array of CB1-dependent behavioral effects, including analgesia, hypothermia and hypomotility.

JZL184 attenuated mechanical and cold allodynia via a CB(1), but not a CB(2), receptor mechanism of action.

JZL184 prolongs depolarization-induced suppression of excitation (DSE) in Purkinje neurons in cerebellar slices and DSI in CA1 pyramidal neurons in hippocampal slices.
