

Product Name : MKI-1
Cat. No. : PC-20555
CAS No. : 1190277-80-5
Molecular Formula : C₁₈H₁₄N₄O
Molecular Weight : 302.34
Target : Other Targets
Solubility : 10 mM in DMSO

Biological Activity

MKI-1 (MASTL inhibitor 1) is a small molecule MASTL (microtubule-associated serine/threonine kinase-like, Greatwall/GWL) inhibitor with IC₅₀ of 9.9 μ M.

MKI-1 (15 μ M, 20h) inhibited the phosphorylation of ENSA in MCF7 and T47D cells, also inhibited the phosphorylation of ENSA in colcemid-induced mitotic MCF7 cells, did not modulate phosphorylated AKT, GSK-3 β , and p70S6K.

MKI-1 inhibits various oncogenic properties of MCF7 cells and does not affect the viability of MCF10A cells.

MKI-1 reduces tumor growth and radiosensitivity of breast cancer cells.

MKI-1 reduces c-Myc stability through PP2A activation in MCF7 cells, inhibits meiotic resumption and spindle formation in mouse oocytes.
