

Product Name : JNJ 10191584 maleate
Cat. No. : PC-20925
CAS No. : 869497-75-6
Molecular Formula : C₁₇H₁₉ClN₄O₅
Molecular Weight : 394.81
Target : Histamine Receptor
Solubility : 10 mM in DMSO

CAS: 869497-75-6

Biological Activity

JNJ-10191584 (VUF6002) maleate is a potent, highly selective, orally active histamine H₄ receptor antagonist with binding K_i of 26 nM, 540-fold selectivity to H₄ receptor over H₃ receptor.

JNJ-10191584 (VUF6002) shows inhibitory effects to chemotaxis of eosinophils and mast cells with IC₅₀ values of 530 nM and 138 nM, respectively.

JNJ 10191584 (10-100 mg/kg p.o., b.i.d.) caused a dose-dependent reduction in macroscopic damage, inhibition of the TNBS-provoked elevation of both colonic myeloperoxidase and tumour necrosis factor-alpha (TNF-alpha), and a reduction in the histologically assessed increase in mucosal and submucosal thickness and neutrophil infiltration.
