

Product Name : JSH-23
Cat. No. : PC-21743
CAS No. : 749886-87-1
Molecular Formula : C₁₆H₂₀N₂
Molecular Weight : 240.35
Target : NF-κB
Solubility : 10 mM in DMSO

Biological Activity

JSH-23 is a small molecule NF-κB inhibitor, inhibits NF-κB transcriptional activity with IC₅₀ of 7.1 μM in LPS-stimulated macrophages RAW 264.7.

JSH-23 inhibits nuclear translocation of NF-κB p65 without affecting IκBα degradation.

JSH-23 (<100 μM) does not show significant cytotoxic effects on the RAW 264.7 cells.

JSH-23 (1 mg/kg, 3 mg/kg; oral daily for 2 weeks) significantly reverses the nerve conduction and nerve blood flow deficits seen in diabetic rats.
