

Product Name : SR1555
Cat. No. : PC-35084
CAS No. : 1386439-51-5
Molecular Formula : C₂₂H₂₂F₆N₂O₂
Molecular Weight : 460.42
Target : ROR
Solubility : 10 mM in DMSO

Biological Activity

SR1555 is a selective **ROR γ** inverse agonist (IC₅₀=1.5 μ M) that suppresses T(H)17 cells and stimulates T regulatory cells. SR1555 is devoid of LXR, FXR, and ROR α activity, displaces [3H]T0901317 from the ligand binding domain (LBD) of ROR γ with IC₅₀ of 1 μ M.

SR1555 represses the expression of ROR γ while leading to increased expression of FGF21 and adipoQ in pre-adipocytes. SR1555 inhibits activation of hormone-sensitive lipase and increased fatty acid oxidation in obese diabetic mice.
