

Product Name : IACS-010759
Cat. No. : PC-35205
CAS No. : 1570496-34-2
Molecular Formula : C₂₅H₂₅F₃N₆O₄S
Molecular Weight : 562.568
Target : Other Targets
Solubility : 10 mM in DMSO

Biological Activity

IACS-010759 (IACS010759) is a small molecule inhibitor of mitochondrial oxidative phosphorylation (**OXPPOS**), targets complex I of the **mitochondrial electron transport chain**.

IACS-010759 decreases cell viability and increases apoptosis with EC₅₀ values between 1 nM-50 nM across multiple lines. IACS-010759 robustly inhibits proliferation and induces apoptosis in models of brain cancer and acute myeloid leukemia (AML) reliant on OXPPOS, reduces aspartate production that leads to impaired nucleotide biosynthesis.

IACS-010759 potently inhibits tumor growth of brain cancer and AML in vivo.
