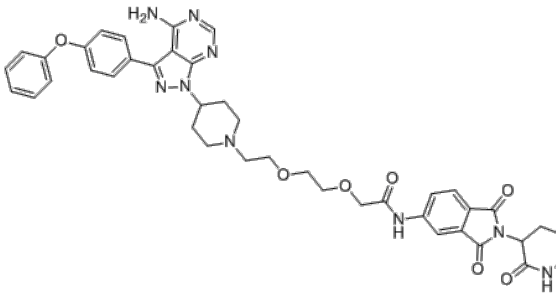
Data Sheet

Global Supplier of Chemical Probes, Inhibitors & Agonists.

Product Name	:	MT-802
Cat. No.	:	PC-35213
CAS No.	:	2231744-29-7
Molecular Formula	:	$C_{41}H_{41}N_9O_8$
Molecular Weight	:	787.834
Target	:	PROTAC
Solubility	:	



Biological Activity

MT-802 (MT802) is a potent **BTK PROTAC** that induces degradation of both wild-type and C481S mutant BTK (DC50=9.1 nM); MT-802 recruits BTK to the cereblon E3 ubiquitin ligase complex to trigger BTK ubiquitination and degradation via the proteasome; MT-802 binds fewer off-target kinases than ibrutinib does and retains an equivalent potency (>99% degradation at nanomolar concentrations) against wild-type and C481S BTK, elicits complete BTK knockdown at 250 nM; reduces the pool of active, phosphorylated BTK in cells isolated from CLL patients with the C481S mutation, whereas ibrutinib cannot.
