

**Product Name** : E-7386  
**Cat. No.** : PC-35329  
**CAS No.** : 1799824-08-0  
**Molecular Formula** : C<sub>39</sub>H<sub>48</sub>FN<sub>9</sub>O<sub>4</sub>  
**Molecular Weight** : 725.87  
**Target** : Beta-catenin  
**Solubility** : 10 mM in DMSO

### Biological Activity

E-7386 (E7386) is a potent, orally active modulator of **CBP/beta-catenin**, disrupts the interaction and inhibits canonical Wnt signaling pathway /TCF reporter gene activity in LiCl-stimulated HEK-293 and MDA-MB-231 with IC<sub>50</sub> of 55 and 73 nM, respectively.

E7386 exhibits anti-tumor activity in vitro tumor proliferation panel against 28 human tumor cell lines.

E7386 modulates the expression of Wnt signaling pathway related genes including AXIN2 and other genes, significantly suppressed the number of polyposis in a dose dependent manner at the dose 8.5-50 mg/kg, also significantly changed the expressions of Wnt related genes in whisker follicle of ApcMin/+mice model.
