

Product Name : DS-1205b
Cat. No. : PC-38043
CAS No. : 1855860-24-0
Molecular Formula : C₄₁H₄₂FN₅O₇
Molecular Weight : 735.81
Target : TAM Receptor (Tyro3-Axl-Mer)
Solubility : 10 mM in DMSO

Biological Activity

DS-1205b (DS1205b) is a potent, highly selective inhibitor of **AXL kinase** with IC₅₀ of 1.3 nM.

DS-1205b displays 48-, 80-, and 313-fold selectivity over MER, MET, and TRKA.

DS-1205b inhibits phosphorylation of AKT serine/threonine kinase in a dose-dependent manner.

DS-1205b does not obviously inhibit cell proliferation and viability in NIH3T3-AXL cells.

DS-1205b significantly suppresses cell migration on NIH3T3-AXL with IC₅₀ of 2.7 nM.

DS-1205b induces tumor regression by 54-86% at doses of 6.3-50 mg/kg in mice bearing subcutaneously implanted NIH3T3-AXL cells.

DS-1205b inhibits AXL signaling in vitro when combined with erlotinib or osimertinib, delays erlotinib acquired resistance and restores the treatment effect of erlotinib in an HCC827 sc xenograft model.
