

Product Name : DS-1001b free base
Cat. No. : PC-38188
CAS No. : 1898206-17-1
Molecular Formula : C₂₅H₁₈Cl₃FN₂O₄
Molecular Weight : 535.777
Target : Isocitrate Dehydrogenase (IDH)
Solubility :

Biological Activity

DS-1001b free base (DS1001b, Safusidenib) is a potent, selective, BBB-permeable and orally bioavailable **mutant IDH1** inhibitor with IC₅₀ of 8.4/11 nM against IDH1 R132H/R132C mutants.

DS-1001b strongly inhibited mutant IDH1, but not wild-type IDH1 or mutant IDH2 (IC₅₀>10 uM).

DS-1001b impairs the proliferation of IDH1 mutant GBM cells and induces differentiation in a subcutaneous PDX model, but not the growth of IDH wild-type GBM.

DS-1001b permeates the BBB and inhibits tumor growth in an orthotopic PDX model.
