

Product Name : EU-5346
Cat. No. : PC-38265
CAS No. : 315698-17-0
Molecular Formula : C₂₃H₂₄F₃N₃O
Molecular Weight : 415.46
Target : Bcl-2
Solubility : 100 mM in DMSO

Biological Activity

EU-5346 (ML311) is a small molecule **Mcl-1** inhibitor with IC₅₀ of 0.31 uM, potently and selectively disrupts Mcl-1/Bim interaction.

EU-5346 induced cell death and decreased spheroid formation in Her2-positive BC cells.

EU-5346 induced ubiquitination of Mcl-1- bound Her2 demonstrating a previously unknown role for Mcl-1 to stabilize Her2 protein levels.

When combined with tamoxifen or trastuzumab, EU-5346 induced significant anti-BC activity in hormone receptor positive or Her2-positive BC cells, respectively.

EU-5346 in combination with paclitaxel induced synergistic anti-BC activity in both paclitaxel-sensitive and paclitaxel-resistant TNBC cells.
