

Product Name : CVT-11127
Cat. No. : PC-38545
CAS No. : 1018674-83-3
Molecular Formula : C₂₅H₂₃Cl₂N₅O₃
Molecular Weight : 512.391
Target : Stearoyl-CoA Desaturase (SCD)
Solubility : 10 mM in DMSO

Biological Activity

CVT-11127 (FMK13918) is a specific small molecule stearyl-CoA desaturase (SCD) inhibitor with IC₅₀ of 210 and 410 nM against rat microsomal SCD and HepG2 SCD, respectively.

CVT-11127 is selective for Δ^9 desaturases, does not inhibit the activity of rat microsomal Δ^5 and Δ^6 desaturases at 30 μ M.

CVT-11127 reduces cell proliferation in human lung and breast cancer cells, decreases de novo lipid synthesis from glucose.

CVT-11127 impairs the ligand-induced phosphorylation of epidermal growth factor (EGF) receptor, causing the inactivation of its downstream targets Akt, ERK and mammalian target of rapamycin in H460 lung cancer cells.
