

Product Name : GSK-2256098
Cat. No. : PC-42177
CAS No. : 1224887-10-8
Molecular Formula : C₂₀H₂₃ClN₆O₂
Molecular Weight : 414.8886
Target : Focal Adhesion Kinase (FAK)
Solubility : DMSO: ≥ 30 mg/mL

Biological Activity

GSK-2256098 (GTPL-7939) is a potent, selective, reversible and ATP-competitive inhibitor of **FAK** kinase with K_i of 0.4 nM; displays high selectivity over a panel of 261 kinases, including the nearest FAK family member, Pyk2 (>1,000-fold); inhibits FAK activity through targeting the phosphorylation site of FAK Y397; decreases levels of phosphorylated Akt and ERK, cell viability, anchorage-independent growth, and motility in L3.6P1 cells; causes lower microvessel density, less cellular proliferation, and higher apoptosis rates in the Ishikawa model.

Pancreatic Cancer

Phase 2 Clinical
