Biological Activity

Y-27632 (Y27632) is a potent, selective **ROCK1** (p160 ROCK) inhibitor with K_i of 140 nM in cell-free assay. Y-27632 exhibits >200-fold selectivity over other kinases, including PKC, cAMP-dependent protein kinase, MLCK and PAK. Y-27632 consistently suppresses Rho-induced, p160ROCK-mediated formation of stress fibres in cultured cells and dramatically corrects hypertension in several hypertensive rat models.
