

Product Name : ITI214
Cat. No. : PC-43068
CAS No. : 1642303-38-5
Molecular Formula : C₂₉H₂₉FN₇O₅P
Molecular Weight : 605.5566
Target : Phosphodiesterase (PDE)
Solubility : DMSO: ≥ 30 mg/mL

Biological Activity

ITI-214 (Lenrispodun) is a potent, selective, orally active **phosphodiesterase 1 (PDE1)** inhibitor with K_i of 58 pM, displays >1,000-fold selectivity over PDE4A/4D and other PDE isoforms.

ITI-214 improves the memory processes of acquisition, consolidation, and retrieval across a broad dose range (0.1-10 mg/kg, po) without disrupting the antipsychotic-like activity of a clinical antipsychotic medication.

ITI-214 shows potential for schizophrenia and Alzheimer's disease, movement disorders, attention deficit and hyperactivity disorders, and other central nervous system (CNS) and non-CNS disorders.
