

Product Name : MCC950 sodium
Cat. No. : PC-43229
CAS No. : 256373-96-3
Molecular Formula : C₂₀H₂₃N₂NaO₅S
Molecular Weight : 426.4618
Target : NOD-like Receptor (NLR)
Solubility : H₂O: ≥ 30 mg/mL

Biological Activity

MCC950 (CP456773, CRID3) sodium is a potent, selective, small-molecule inhibitor of **NLRP3** inflammasome with IC₅₀ of 7.5 and 8.1 nM in BMDM and HMDM, respectively.

MCC950 (CP-456773) specifically inhibits activation of NLRP3, does not inhibit NLRC4, AIM2, TLR signalling or priming of NLRP3.

MCC950 (CP-456773) blocks NLRP3 induced ASC oligomerization, does not block K⁺ efflux, Ca²⁺ flux or NLRP3-ASC interactions.

MCC950 (CP-456773) reduces interleukin-1β (IL-1β) production in vivo and attenuates the severity of experimental autoimmune encephalomyelitis (EAE), rescues neonatal lethality in mouse model of CAPS and is active in ex vivo samples from individuals with Muckle-Wells syndrome.
