

Product Name : MK-8033 hydrochloride
Cat. No. : PC-43478
CAS No. : 1283000-43-0
Molecular Formula : C₂₅H₂₂ClN₅O₃S
Molecular Weight :
Target : c-Met (HGFR)
Solubility : 10 mM in DMSO

Biological Activity

MK-8033 is a potent, specific, dual **c-Met/Ron** kinases inhibitor with IC₅₀ of 1/7 nM, also potently inhibits oncogenic c-Met activation loop mutants Y1230C, Y1230H and Y1235D with IC₅₀ of 0.6-1.2 nM; MK-8033 is >100-fold selective relative to Ron and c-Met inhibition against a panel of 221 kinases; potently and selectively inhibits growth in c-Met amplified cell lines (GTL-16 proliferation IC₅₀ =582 nM), causes full inhibition of tumor growth in c-Met amplified (GTL-16) subcutaneous tumor xenograft model; synergizes with carboplatin plus paclitaxel to inhibit ovarian cancer cell growth.

Solid Tumors
Phase 1 Clinical
