

Product Name : CDDO Methyl ester
Cat. No. : PC-43494
CAS No. : 218600-53-4
Molecular Formula : C₃₂H₄₃NO₄
Molecular Weight : 505.69
Target : Keap1-Nrf2
Solubility : DMSO: ≥ 49 mg/mL

Biological Activity

CDDO Methyl ester (NSC 713200, RTA 402, Bardoxolone methyl, CDDO-Me) is a potent activator of **Nrf2**, inhibits proliferation, induces differentiation and apoptosis in AML cells.

CDDO Methyl ester induces rapid apoptosis (IC₅₀=0.1-0.3 μM) and triggers a series of effects associated with apoptosis including a rapid release of cytochrome c from mitochondria, activation of procaspase-9, -7, -6, and -3, and cleavage of PARP and lamin A/C in NSCLC cells.

CDDO Methyl ester also demonstrates potent antidiabetic activity, reducing proinflammatory cytokine expression in high fat diet-fed type 2 diabetic mice.
