

**Product Name** : Dorsomorphin  
**Cat. No.** : PC-43522  
**CAS No.** : 866405-64-3  
**Molecular Formula** : C<sub>24</sub>H<sub>25</sub>N<sub>5</sub>O  
**Molecular Weight** :  
**Target** : AMPK  
**Solubility** : 10 mM in DMSO

### Biological Activity

Dorsomorphin (BML-275, Compound C) is a potent, selective and reversible **AMPK** inhibitor with K<sub>i</sub> of 109 nM, shows no significant activity on ZAPK, SYK, PKCθ, PKA and JAK3.

Dorsomorphin (BML-275, Compound C) inhibits AMPK activation induced by AICAR and Metformin, also inhibits bone morphogenetic protein (BMP) type I receptors (ALK2, ALK3 and ALK6).

Dorsomorphin (BML-275, Compound C) promotes cardiomyogenesis in mouse embryonic stem cells (ESCs) in vitro, induces autophagy in cancer cell lines via a mechanism independent of AMPK inhibition.
