

Product Name : Tivantinib
Cat. No. : PC-45842
CAS No. : 905854-02-6
Molecular Formula : C₂₃H₁₉N₃O₂
Molecular Weight : 369.4159
Target : c-Met (HGFR)
Solubility : 10 mM in DMSO

Biological Activity

Tivantinib (ARQ-197) is a potent, selective, non-ATP-competitive inhibitor of **c-Met** with K_i of 355 nM.

Tivantinib (ARQ-197) has no inhibition for EGFR, InsR, PDGFR α , FGFR1 and FGFR4 etc., only modest inhibition (35%) for Ron at 30 μ M.

Tivantinib (ARQ-197) inhibits constitutive c-Met phosphorylation in HT29 and MKN-45 cells, and HGF-induced c-Met phosphorylation in MDA-MB-231 and NCI-H441 cells with IC_{50} of 100-300 nM.

Tivantinib (ARQ-197) shows antiproliferative activity against multiple cancer cell lines (IC_{50} =0.03-30 μ M).

Tivantinib (ARQ-197) exerts tumor growth inhibition in multiple mouse xenograft; orally active.
