

Product Name : BCX-1470
Cat. No. : PC-45881
CAS No. : 217099-43-9
Molecular Formula : C₁₄H₁₀N₂O₂S₂
Molecular Weight : 302.3714
Target : Complement System
Solubility : 10 mM in DMSO

Biological Activity

BCX-1470 (BCX1470) is a serine protease inhibitor that inhibits the esterolytic activity of **factor D** (IC₅₀=96 nM) and **C1s** (IC₅₀=1.6 nM).

BCX-1470 displays 3.4-fold and 200-fold better than that of trypsin, respectively.

BCX-1470 inhibits esterolytic activity translates into potent inhibition of the proteolytic activity of C1s, factor D, and consequently of the classical and alternative pathway-mediated hemolysis of target RBC (IC₅₀=46 nM and 330 nM, respectively).

BCX-1470 blocks the reverse passive Arthus (RPA) reaction in rats.
