

Product Name : Perifosine
Cat. No. : PC-45903
CAS No. : 157716-52-4
Molecular Formula : C₂₅H₅₂NO₄P
Molecular Weight : 461.6584
Target : Akt
Solubility : 10 mM in DMSO

Biological Activity

Perifosine (KRX-0401, D21266) is an oral bioavailable alkylphospholipid, acts as an **Akt** inhibitor and a **PI3K** inhibitor, induces p21(WAF1) expression in squamous carcinoma cells through a p53-independent pathway. Perifosine enhances apoptosis and inhibits the growth of xenografts in nude mice combined with a lysosomal inhibitor. Perifosine displays significant antiproliferative activity in vitro and in vivo in several human tumor model
