

**Product Name** : Rotigotine hydrochloride  
**Cat. No.** : PC-46022  
**CAS No.** : 125572-93-2  
**Molecular Formula** : C<sub>19</sub>H<sub>26</sub>ClNOS  
**Molecular Weight** : 351.9338  
**Target** : Dopamine Receptor  
**Solubility** : 10 mM in DMSO

## Biological Activity

A non-selective agonist of the dopamine D3 receptor (K<sub>i</sub>=0.71 nM); has 10-fold selectivity for the D3 receptor over the D2, D4, and D5 receptors and 100-fold selectivity for the D3 receptor over the D1 receptor; behaves as a full agonist of D1, D2, and D3 with similar potencies (EC<sub>50</sub>) in functional assay; also demonstrates significant affinity at α-adrenergic (α<sub>2B</sub>, K<sub>i</sub>=27 nM) and serotonin receptors (5-HT<sub>1A</sub> K<sub>i</sub>=30 nM); significantly attenuates MPTP-induced acute cell degeneration in mouse model.

Parkinson's Disease

Approved
