|--------------------------|---|--|
| <b>Product Name</b>      | : | NS3694   |
| <b>Cat. No.</b>          | : | PC-49742   |
| <b>CAS No.</b>           | : | 426834-38-0  |
| <b>Molecular Formula</b> | : | C <sub>15</sub> H <sub>10</sub> ClF <sub>3</sub> N <sub>2</sub> O <sub>3</sub> |
| <b>Molecular Weight</b>  | : | 358.70   |
| <b>Target</b>            | : | Caspase  |
| <b>Solubility</b>        | : | 10 mM in DMSO  |

## Biological Activity

NS3694 (NS 3694) is a specific cell-permeable diarylurea compound that inhibits **apoptosome** formation and caspase activation, blocks cytochrome c-induced caspase activation in HeLa cell cytosolic extracts with IC<sub>50</sub> of 50 uM.

NS3694 inhibits cytochrome c- and dATP-induced DEVDase activation and processing of caspases and caspase substrates.

NS3694 inhibits the association of caspase 9 to Apaf-1.

NS3694 blocks the formation of the 700-kDa apoptosome complex. NS3694 (10-100 uM) inhibits TNF-induced effector caspase activation and apoptosis in MCF-casp3 cells.

NS3694 inhibits TNF- and staurosporine-induced effector caspase activation and TNF-induced apoptosis in ME-180as cells.

NS3694 does not inhibit FasL-induced DEVDase activity or FasL-induced cytotoxicity in SKW6.4 cells.
