## Biological Activity

SCB-4380 (SCB 4380, SCB4380) is the first potent, selective inhibitor for **PTPRZ** (protein tyrosine phosphatase receptor-type Z) with IC<sub>50</sub> of 0.4 μM against human Z-ICR-catalyzed hydrolysis.

SCB-4380 also strongly inhibits PTPRG (IC<sub>50</sub>=0.4 μM), and shows little inhibition on PTPRA, PTPRM, PTPRS, PTPRB, PTPN1 and PTPN6.

SCB-4380 inhibits PTPRZ activity in C6 glioblastoma cells, and suppresses cell migration and proliferation in vitro and tumor growth in a rat allograft model.
