

Product Name : MKT-077
Cat. No. : PC-62565
CAS No. : 147366-41-4
Molecular Formula : C₂₁H₂₂ClN₃OS₂
Molecular Weight : 432
Target : Heat Shock Protein (HSP)
Solubility : 10 mM in DMSO

Biological Activity

MKT-077 (FJ-776) is a highly water-soluble (>200 mg/ml) rhodacyanine dye that exhibits significant antitumor activity, binds to **Hsp70** family member, mortalin (mot-2), and abrogates its interactions with p53.

MKT-077 induces release of wild-type p53 from cytoplasmically sequestered p53-mot-2 complexes and rescued its transcriptional activation function.

MKT-077 also is a potent **telomerase** inhibitor with IC₅₀ of 5 uM.
