

Product Name : TPN729
Cat. No. : PC-63028
CAS No. : 936951-20-1
Molecular Formula : C₂₅H₃₆N₆O₄S
Molecular Weight : 516.661
Target : Phosphodiesterase (PDE)
Solubility : 10 mM in DMSO

Biological Activity

TPN729 (TPN-729) is a novel potent, selective phosphodiesterase type 5 (**PDE5**) inhibitor with IC₅₀ of 2.28 nM, shows better selectivity profile 2.5 times higher than sildenafil against PDE6 and 500 times higher than tadalafil against PDE11. TPN729 selectively inhibits PDE5 and blocks the degradation of cyclic guanosine monophosphate, and is a promising PDE5 inhibitor providing fewer side effects and better compliance.
