## Biological Activity

AZD-0284 is a potent, selective, orally bioavailable **RORC2** inverse agonist with IC<sub>50</sub> of 17 nM in TH17 cell assays.

AZD-0284 potently inhibited IL-17A secretion from primary human TH17 cells with excellent metabolic stability and good PK in preclinical species.

AZD-0284 reduced thymocyte numbers in mice and showed dose-dependent reduction of IL-17A containing  $\gamma\delta$ -T cells and of IL-17A and IL-22 RNA in the imiquimod induced inflammation model.
