

Product Name : WT161
Cat. No. : PC-70299
CAS No. : 1206731-57-8
Molecular Formula : C₂₇H₃₀N₄O₃
Molecular Weight : 458.55
Target : HDAC
Solubility : 10 mM in DMSO

Biological Activity

WT161 (WT-161) is a potent, selective, and bioavailable **HDAC6** inhibitor with IC₅₀ 0.4 nM.

WT161 displays >20-fold selectivity over HDAC1/2/3/8.

WT161 selectively inhibits HDAC6 and dramatically increases levels of acetylated α-tubulin with little effect on global lysine acetylation in cells.

WT161 reversibly and rapidly induces the accumulation of Ac-α-tubulin in MM cell lines, displays synergism with both BTZ and CFZ, caspase activation and apoptosis.

WT161 demonstrates a significant antitumor effect in human MM cell xenograft mouse model combined with BTZ.
