

Product Name : ML297
Cat. No. : PC-70331
CAS No. : 1443246-62-5
Molecular Formula : C₁₇H₁₄F₂N₄O
Molecular Weight : 328.32
Target : Potassium Channel
Solubility : 10 mM in DMSO

Biological Activity

ML297 (VU 0456810) is a potent, selective, CNS-penetrant small molecule agonist of **GIRK** channels with EC₅₀ of 160 nM. ML297 shows a preference for the GIRK1/GIRK2 subunit combination compared to GIRK1/GIRK4 and is inactive on GIRK2/GIRK3 and a number of other potassium channels.

ML297 selectively activates recombinant neuronal GIRK channels containing the GIRK1 subunit in a manner that requires PIP₂.

ML297 decreases anxiety-related behavior without sedative or addictive liabilities in mice.
