## **Biological Activity**

Zedoresertib (Debio 0123) is a potent, orally available, and highly selective **Wee1 kinase** inhibitor with IC50 of 0.8 nM, Ki of 0.1 nM.

Debio 0123 is highly selective to Wee1 on 465 selected kinases in a cellfree system, does not inhibit Plk1 and Plk2, as also reported in recent publications for AZD1775.

Debio 0123 exhibits in vitro growth inhibition activity in a broad number of human cancer cell lines (IC50= 0.109 to 7.08 uM).

Debio 0123 prevent CDC2 / Cdk1 phosphorylation, induces  $\gamma$ H2AX and enhances phosphorylation of histone H3. Debio 0123 induces apoptosis through mitotic catastrophe following cell cycle progression despite accumulation of unrepaired DNA damage both in vitro and in vivo.
