

Product Name : T2AA
Cat. No. : PC-72920
CAS No. : 1380782-27-3
Molecular Formula : C₁₅H₁₅I₂NO₃
Molecular Weight : 511.09
Target : DNA Repair Protein
Solubility : 10 mM in DMSO

Biological Activity

T2AA (S-T2AA, T2 amino alcohol) is a small molecule **proliferating cell nuclear antigen (PCNA)** inhibitor, inhibits interaction of PCNA/PIP-box peptide with IC₅₀ of 1 uM.

T2AA also inhibits interaction of PCNA and full-length p21 protein.

T2AA abolished interaction of PCNA and DNA polymerase δ in cellular chromatin, arrested cancer cells in S-phase, inhibited growth of cancer cells with induction of early apoptosis.

T2AA significantly inhibited translesion DNA synthesis on a cisplatin-cross-linked template in cells, induced significant increase in phospho(Ser139) histone H2AX induction and cell growth inhibition combined with cisplatin;
