

Product Name : ONO-7475
Cat. No. : PC-73130
CAS No. : 1646839-59-9
Molecular Formula : C₃₂H₂₆N₄O₆
Molecular Weight : 562.582
Target : TAM Receptor (Tyro3-Axl-Mer)
Solubility : 10 mM in DMSO

Biological Activity

ONO-7475 (Tamnorzatinib) is a potent inhibitor of the TAM receptor tyrosine kinase family (**Axl** IC₅₀=0.7 nM), inhibits the phosphorylation of AXL and Mer, suppresses the growth of AML with FLT3 mutations.

ONO-7475 sensitizes AXL-expressing EGFR-mutant NSCLC cells to the EGFR-TKIs osimertinib and dacomitinib.

ONO-7475 suppresses the emergence and maintenance of EGFR-TKI-tolerant cells, suppresses the phosphorylation of AKT, p70S6K, ERK, as well as EGFR.

Combination therapy of ONO-7475 and osimertinib delays regrowth of cell line-derived xenograft tumors.

Osimertinib-acquired resistant cells are insensitive to combined therapy with osimertinib and ONO-7475.
