### Biological Activity

MYC inhibitor EN4 is a covalent ligand and inhibitor of **MYC**, targets cysteine 171 of MYC and inhibits MYC transcriptional activity (EC<sub>50</sub>=2.8 uM).

EN4 inhibited MYC/MAX binding to the E-box response element DNA consensus sequence in a dose-responsive manner with EC<sub>50</sub> of 6.7 uM.

EN4 directly and covalently modifies pure full-length c-MYC protein at C171 to inhibit MYC/MAX DNA binding in vitro.

EN4 engages MYC in cells, reduced MYC and MAX thermal stability in 231MFP breast cancer cells.

EN4 downregulates multiple MYC transcriptional targets, and impairs tumorigenesis.
