

**Product Name** : SRI-41315  
**Cat. No.** : PC-73345  
**CAS No.** : 1613509-49-1  
**Molecular Formula** : C<sub>22</sub>H<sub>19</sub>N<sub>3</sub>O<sub>2</sub>  
**Molecular Weight** : 357.413  
**Target** : CFTR  
**Solubility** : 10 mM in DMSO

### Biological Activity

SRI-41315 is a small molecule that induces translational readthrough of **CFTR** nonsense mutations by **eRF1** depletion, restores CFTR expression and function, suppresses CFTR nonsense mutations.

SRI-41315 induces translational readthrough by depleting eRF1 protein level and prolonging the translational pause that occurs at premature termination codons (PTCs).

SRI-41315 reduced eRF1 levels in a manner dependent upon a ubiquitin-mediated proteasome degradation pathway.

SRI-41315 in combination with G418 restores CFTR function in primary bronchial epithelial cells derived from a CF patient with CFTR nonsense alleles.
