

Product Name : Tulmimetostat
Cat. No. : PC-73451
CAS No. : 2567686-02-4
Molecular Formula : C₂₈H₃₆ClN₃O₅S
Molecular Weight : 562.122
Target : Histone Methyltransferase (HMTase)
Solubility : 10 mM in DMSO

Biological Activity

Tulmimetostat (CPI-0209) is a potent, selective, orally available **EZH2** inhibitor with K_i of 140 fM by kinetic analyses and K_i 180 fM by thermal shift assays.

Tulmimetostat (CPI-0209) only inhibits EZH2 and the closely related EZH1 enzyme against a panel of over 30 protein and DNA methyltransferases at 10 μM.

Tulmimetostat (CPI-0209) potently inhibits global H3K27me3 levels in cell-based assays with IC₅₀ of 0.38 nM, >50-fold more potent than Tazemetostat.

Tulmimetostat (CPI-0209) potently inhibits KARPAS-422 cell proliferation in a dose-dependent manner (IC₅₀=6 nM), >50-fold more potent than Tazemetostat.

Tulmimetostat (CPI-0209) exhibits a profound reduction in global H3K27me3 levels in tumors and growth inhibitory effect in KARPAS-422 mouse xenograft model.
